About me

In inspite of my studies in the Electrical Engineering field, throughout my career I fell in love with software development.

Currently I'm focused on web applications, mainly on the front-end stack. However, I intend to be able to develop, in a near future, mobile interfaces and the back-end of applications.

I'm extremely motivated by challenges and I like to 'get my hands dirty': let's code!

I'm a fast learner, and learning is also a motivating factor for me in a daily basis. I like not only to acquire knowledge, but also to share it with other people whenever possible.

I value collaborative and relaxing environments, that have great aspirations and encourage my personal growth.

Education

Electrical Engineering (2016-Ongoing)
Universidade Federal de Juiz de Fora, Brazil

Electrical Engineering (2019-2020)
Politechnika Wroclawska, Poland

Skills

Techs
HTML, CSS, JavaScript, TypeScript, React.js, Node.js, ElasticSearch, MySQL, Git, GitHub

Methodologies
Scrum, Kanban

Languages

English - Full Professional Proficiency

German - Elementary Proficiency

Experience
